

KEEP IT- *PURE*

Recently seen as a Sportsboat news item, and featured since then at the Schrodgers Excel London Boat Show, D-TX fuel safe claims to be the only advanced warning of water in fuel available on the market.

It is designed for use with both diesel and petrol systems. It is relatively simple to fit, and should be positioned between the fuel tank and the engine. If it detects water in your fuel, it sets off an indicator on your dashboard, allowing you to shut the engine down and drain off the water via the dedicated plug.

The D-TX fuel safe can save you time, money, costly repairs, and even life endangering situations. It is suitable for all commercial and leisure marine craft, and allows you the peace of mind to enjoy your day on the water.

For further information or to order, visit www.waterinfuel.com or phone 0870 432 5032.
